**Madrid Abierto Public Art Project Competition** is a project framed within so-called Public Art i.e. interventions and performances derived from an artistic concept and developed preferably in a public and open context. Interacting with social and political processes, these works are aimed at the active or passive protagonists of such processes, i.e. all those people who, directly or indirectly, regularly or occasionally, live

We call for the third edition of **Idensitat Calaf/Manresa 05**, promoted by the Town Councils of Calaf and Manresa, and by Diputació de Barcelona and Generalitat de Catalunya. The aim is that of gathering different people attached to creative practices related to public space, either through practices of intervention or through an open and critical debate.

The present edition intends to lead these parameters of work towards a specific subject matter: **Urban Growth and Expansion**, an emerging phenomenon in both towns where the project takes place, Calaf and Manresa, and which, in short, will redefine their social and cultural context.

The call promotes the production of 5 projects in the contexts of Calaf and Manresa, and there is a fund of 8.000 Å for project. The deadline for the projects is the 30th of April 2005.

It is possible to consult the terms and conditions in:
